MOBILE AIR CONDITIONER

This Mobile Air Conditioner is a small size appliance, which can adjust the temperature and humidity in a room. Its flexibility characteristics make it easily used on different occasions in different rooms. It also has multiple functions, including cooling, dehumidifying and fanning ventilation. This unit was designed especially to be used in a family house, office, etc. It has a compact design compared to others with the same cooling capacity. Power consumption is low and the noise especially low.

Features of heating operation: the machine heating operation, the principle is that the air is heated by the electrical tubes before sent out. The function is not affected by ambient temperature.

Other air conditioning patterns are recommended when the indoor temperature is either below 17°C (63°F) or above 35°C (95°F).

ATTENTION

Before you use your PORTABLE AIR CONDITIONER, please read this instruction manual carefully so that you get the best from the unit.

This instruction manual is used for guidance and does not form part of a contract. We reserve the right to make technical changes without prior notice.
